- **Author:** Anscombre (Jean-Claude)
- **Abstract:** the aim of this study is to bring together the main claims and results relating to the existence and properties of what the author refers to as *the null article in French*, with a special emphasize on the constraints it assigns to a noun phrase. The study rests upon an abundant corpus, and starts by bringing out the main properties of such an article in the structure support verb + NP. The second part of the study is devoted to show the link between the null article and other phenomena concerning the noun phrase, and to claim – on the basis of the above mentioned properties – that there is a null article also in such constructions as prepositional noun phrases.
