- **Author:** Donaire (María Luisa)
- **Abstract:** This paper addresses a semantic description of *finale^{ment}*, applying explicit criteria. The aim is to determine the number of semantic entities covered by the lexical entity *finale^{ment}*, as well as the corresponding semantic values. The approach goes beyond the superficial linguistic facts, reaching the deep semantic level. This is made possible thanks to a polyphonic framework that enables a deep characterization of units, using reliable linguistic tests. The study concludes that there are two *finale^{ment}*, characterised by different linguistic properties. The description provides useful data to establish differences with other semantically close units.
