Palafox au pays des moralistes

- **Publication type:** Article from a collective work
- **Collective work:** [Éric Chevillard dans tous ses états](#)
- **Author:** André (Marie-Odile)
- **Abstract:** This article focuses on the way Éric Chevillard constructs the posture of a moralist in his works and blog by developing a model centred on three principal traits: an enunciative authority which takes shape as it discards itself; a narrative whose dynamic has the effect of dragging it out of itself; and ethical choices based on the eminently unstable part of judgement which is humour.
