L'Invention du nombre Des mythes de création aux *Éléments* d'Euclide

- **Publication type:** Book
- **Author:** Keller (Olivier)
- **Abstract:** Ethnography and oriental mythologies clearly show the archaic modelling of creative energy through the contradictory concept of the multiplicity of the One : hence the possibility of the concept of integer. This work explores its genesis in different societies and its theorization in Euclid's *Elements*.
- **Number of pages:** 343
