## Sur les « singulières chevauchées » de Houellebecq à travers la philosophie

- **Publication type:** Article from a collective work
- **Collective work:** [L'Unité de l'œuvre de Michel Houellebecq](#)
- **Author:** Szymanski (Tomasz)
- **Abstract:** Houellebecq believes that Western individualism and liberalism have foundered ; he sees the possibility of a technological and trans-humanistic solution to the problem of death, as well as the necessity for a new religion based on science. In this context, he asks about the “conditions of possibility” for happiness, which may be identified with a completely human, unconditional and infinite love.
