- **Author:** Salaün (Franck)
- **Abstract:** As opposed to Diderot, the baron d'Holbach deliberately chose clandestinity. His works thus publicised a project of reform which aimed to reinforce the status of men of letters to the point that they constitute a counterweight to political authority. He was seeking to install a new political organisation more respectful of human rights. The example of private property allows us to introduce some nuances in the traditional portrait of the author of the *Système de la nature*.
