Jean-Benoît Puech et le sentiment du paysage

- **Publication type:** Article from a collective work
- **Collective work:** [Les Mondes de Jean-Benoît Puech](#)
- **Author:** Baetens (Jan)
- **Abstract:** This article returns to the experience of landscape in the *œuvre* of Jean-Benoît Puech. It focuses in particular on the descriptions, that reveal a feeling of the landscape which completes, in an unexpected manner, the poetics of transposition so dear to the author. This feeling is not produced by the evocation of extraordinary spectacles but simply through stylistic means, of which the principal is without doubt the transformation of the landscape-object into the landscape-sequence.
