L'ekphrasis huysmansienne ou la description du second degré

- **Publication type:** Article from a collective work
- **Collective work:** [Poétiques du descriptif dans le roman français du xix^e siècle](#)
- **Author:** Prigent (Gaël)
- **Abstract:** Connected with painting, the work of Huysmans is as well, through fiction and the place given to transpositions of art. From *À rebours* onwards, ekphrasis has a preeminent role, but once Moreau's Salomes appear, the extreme ambivalence of these descriptions acquires a dream-like dimension. The first works already offer examples of the similarity between the description of a real work and the dream account, or, better still, the ekphrasis of a dreamt-up work.
